A million shades of gray This book, A million shades of gray, is one of the best books I have ever read. First the book starts out slow, and kind of boring. But if you keep on reading, you will find out that it gets better. This book is more of a serious book, and may not be for kids under the age of 10. I enjoyed this book, and I hope you will too.

A million shades of grey. Posted by JD. 7. It must seem odd to the Sunday drivers droning past along Marine Drive when they glance over at the line of birders staring out at what appears to be nothing on the mighty Ribble marshes from the Crossens pull-in. It feels pretty strange being the person doing the 'scoping sometimes too, and a few hours staring into the gloom with the 'scope on full zoom today were fairly testing.

At its heart, A Million Shades of Gray is a story about family and friendship, themes any young reader can relate to. However, though the publisher suggests this novel for ages 10+, some of the more violent scenes and allusions to war crimes might be difficult for readers that young. This is a great story, but parental discretion is advised.

A Million Shades of Gray is a devastating book. It shows a village, a country, torn apart by war. It's chaotic. It's violent. It's ugly. Y'Tin may have known war most of his life--it may be all that he's able to remember. But he doesn't like it. He doesn't understand why. The novel is well written, just what I'd expect from a Newbery award-winning author.
