Database Software and Applications | Microsoft Access

Access 2010 is a program that can let anyone create a functional database as quickly as possible. This product is part of the Microsoft Office 2010 suite of programs. There are many different features that are used in MS Access 2010. Besides databases, Access allows anyone to create the best looking reports that they can use.

Microsoft Access 2010 Tutorial - Office 2010 Training | IT ...

Access makes it easy to create a form from any table in your database. Any form you create from a table will let you view the data that's already in that table and add new data. Once you've created a form, you can also modify it by adding additional fields and design controls such as combo boxes.

Access 2010: Creating Forms - GCFGlobal.org

Access 2010 includes table-level triggers and stored procedures built into the ACE data engine. Thus a Client-server database system is not a requirement for using stored procedures or table triggers with Access 2010. Tables, queries, forms, reports and macros can now be developed specifically for web based applications in Access 2010.

Microsoft Access - Wikipedia

O Access 2010 Runtime é semelhante aos runtimes anteriores no que diz respeito a toda a interface do usuário relacionada ao design ter sido removida ou desabilitada. Não é necessário comprar nenhum produto especial para redistribuir o Access 2010 Runtime.

Download Microsoft Access 2010 Runtime from Official ...

In Access 2010, select the Design tab in the toolbar at the top of the screen. Then click on the Property Sheet button in the Tools group. When the Property Sheet appears, select Form from the drop down if it is not already selected. You should now see the properties for the Form object.

MS Access 2010: Form Properties - techonthenet.com

Beginning in the Access 2010 release, Access contains many new macro actions that enable you to build more powerful macros than you can build by using earlier versions of Access. For example, you can now create and use global temporary variables by using macro actions, and you can handle errors more gracefully by using new error-handling macro actions.

Introduction to Access programming - Access

Access 2010 offers several advanced options for creating and modifying reports. The Report Wizard is a tool that guides you through the process of creating complex reports. Once you've created a report—whether through the Report Wizard or the Report command—you can then format it to make it look exactly how you want.

Access 2010: Advanced Report Options - GCFGlobal.org

In Access 2010, this property indicates how many columns to display in our combo box. Since our query that we built returns both the ShipperID and the CompanyName, we will set the Column Count property to 2. This would display two columns in our combo box drop-down list.

MS Access 2010: Number of columns in combo box
