The system engineering StateOrientedactivity The software engineering activity diagrams are only designed for StateOrientedtype.

Creating activity diagrams - IBM

An activity diagram visually presents a series of actions or flow of control in a system similar to a flowchart or a data flow diagram. Activity diagrams are often used in business process modeling. They can also describe the steps in a use case diagram. Activities modeled can be sequential and concurrent. In both cases an activity diagram will have a beginning (an initial state) and an end (a final state).
