A Maritime power is a nation with a very strong navy, which often is also a great power, or at least a regional power. A Maritime power is able to easily control their coast, and exert influence upon both nearby and far countries. A nation that dominates the world navally is known as a maritime superpower.

Maritime power - Wikipedia

is growing. So is interest in cooperative maritime security, an idea advanced by the world's leading naval power, the United States. At the same time, technology is increasing the vulnerability of naval vessels and shipping on the oceans' surface. If the latter development means that the maritime domain may become less secure, the former ...
