What is business intelligence?

Turning data into business...

Self-service business intelligence (SSBI) involves the business systems and data analytics that give business end-users access to an organization's information without direct IT involvement. Self-service Business intelligence gives end-users the ability to do more with their data without necessarily having technical skills.

What is Business Intelligence? BI Definition

Business intelligence data is typically stored in a data warehouse or in smaller data marts that hold subsets of a company's information. In addition, Hadoop systems are used within BI architectures as repositories or landing pads for BI and analytics data; especially for unstructured data, log files, sensor data and other types of big data.
