104 pages, 50 illustrations, size 5.5 x 8.5 inches. A faithful reproduction of the John Thorpe BOOK OF THE HONDA a fully illustrated repair and maintenance manual that covers the 50cc models C100, C102, Monkey Bike, CE105H Trails Bike, C110 & C114. The 125cc models C92, CB92 & Benley. The 250cc models C72 & CB72. The 305cc models C77, CB77. Originally published in 1967 by Floyd Clymer this illustrated manual contains repair and maintenance data for both Kick and Electric Start models including Electrical and Ignition Equipment, Wiring Diagrams, Clutch, Carburetion, Transmission, Forks, Engine, Brakes and more. It also includes information on routine service, maintenance and tune ups plus technical specification charts. While not as exhaustive as a factory manual there is adequate detailed text and diagrams to assist in major refurbishing such as an engine rebuild or even a complete mechanical renovation. An essential addition to any Honda Motor Cycle Enthusiast's library, this book has been out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market. This is a - must have - reference for this series of Honda motorcycles and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide.

fuels to be continuously developed and adopted. The central theme here is two-fold: internal combustion engines and fuel solutions for combustion systems. Internal combustion engines remain as the main propulsion system used for ground transportation, and the number of successful developments achieved in recent years is as varied as the new design concepts introduced. It is therefore timely that key advances in engine technologies are organised appropriately so that the fundamental processes, applications, insights and identification of future development can be consolidated. In the future and across the developed and emerging markets of the world, the range of fuels used will significantly increase as biofuels, new fossil fuel feedstock and processing methods, as well as variations in fuel standards continue to influence all combustion technologies used now and in coming streams. This presents a challenge requiring better understanding of how the fuel mix influences the combustion processes in various systems. The book allows extremes of the theme to be covered in a simple yet progressive way.

A service and repair manual with generic model coverage, suitable for 50 to 250cc scooters with carburettor engines. Includes a data section on the following models Aprilia SR50 (94-99), Rally 50, Sonic FT and GP, Leonardo 125.
