Following in the tracks of the author's well-known Alfa DOHC tuning manual, Jim Kartalamakis describes all kinds of useful information and techniques to increase power, performance and reliability of V6 Alfas and their engines. This book is the result of much research and firsthand experience gained through many projects concerning Alfa V6 rear-wheel drive models, from the GTV6 series to the last of the 75 3.0 models. A wealth of completely new information can be found here regarding cylinder head mods, big brake mods, LSD adjustment procedure, suspension modifications for road and track, electrical system improvements, flowbench diagrams, dyno plots, and much more!

After saving Alfa Romeo from oblivion in 1987, it took Fiat nearly five years to debut the first new Alfa produced under its control. This is the story of how the competition versions of the 155/156/147 family of cars were developed and subsequently raced to many championship titles and race wins. Alfa Romeo's 155 saloon was a comprehensively successful racing touring car that won the German and world-wide DTM Championship, and later ITC races. The model also took on the role of representing the company in national touring car championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success. This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.

Here is a fact and picture-packed book dedicated solely to the Giulia GT in all its forms including the fabulous light-weight GTA racer. Now an updated, large format third edition which includes over 100 new images and which is limited to 1500 copies.
