The UN was founded in 1945 after ww2 to replace the League of Nations, to stop wars between countries and to provide a platform for dialogue

As political, economic, and environmental issues increasingly spread across the globe, the science of geography is being rediscovered by scientists, policymakers, and educators alike. Geography has been made a core subject in U.S. schools, and scientists from a variety of disciplines are using analytical tools originally developed by geographers. Rediscovering Geography presents a broad overview of geography's renewed importance in a changing world. Through discussions and highlighted case studies, this book illustrates geography's impact on international trade, environmental change, population growth, information infrastructure, the condition of cities, the spread of AIDS, and much more. The committee examines some of the more significant tools for data collection, storage, analysis, and display, with examples of major contributions made by geographers. Rediscovering Geography provides a blueprint for the future of the discipline, recommending how to strengthen its intellectual and institutional foundation and meet the demand for geographic expertise among professionals and the public.

In the last few years, national and international politics have been characterised by the erasure of race| and ethnicity within public policy and discourse. Events such as the escalation in race| hate crime associated with the EU Referendum in the UK, the rise of the far right across European polities, or Donald Trump's promise to build a wall across Mexico, contradict the political rhetoric of the arrival| of a post-race| era. This new edition of a widely-respected textbook examines welfare policy and racism, alongside institutional racism and community cohesion within a broad policy framework. Fully updated, it contains: | a new foreword by Professor Kate Pickett, acclaimed co-author of The Spirit Level | two new chapters on ethnicity, disability and chronic illness, and education policy and race| respectively | recent changes in black and minority ethnic demographics in the UK | a post-script from a minority student on her struggle to make a new home in Britain Suitable for undergraduate and postgraduate courses in social policy, sociology and applied social sciences, it includes: | updated empirical data and examples | links to external sources for further reading | questions for discussion, reflection and further learning. Covering an unrivalled range of social welfare issues, the marriage of theory, history and contemporary data makes important and difficult debates about race|, ethnicity, discrimination and social equality more accessible to a student audience as well as policy and welfare practitioners interested in its global themes of immigration, austerity and securitisation.
