"This is a detailed yet practical guide to planning, developing, and evaluating nursing curricula and educational programs. It provides a comprehensive and critical perspective on the totality of variables impacting curricular decisions... This book provides readers with a comprehensive overview of curriculum development, redesign, and evaluation processes and exposes them to the variables impacting curricular decisions... 92 - 4 Stars." Kathleen A. Poindexter, PhD, MSN, RN, CNE, Doody's Book Reviews New Edition of The Leading Nursing Text on Curriculum Development and Evaluation! This third edition of the leading nursing text on curriculum development and evaluation continues to address relevant NLN and AACN core competencies for curricula in all undergraduate and graduate nursing programs. Written for graduate students and faculty, this new edition responds to the many changes that have occurred in nursing and education since the second edition was published. These include the continued shortage of nursing faculty and the projected additional losses of experienced faculty due to impending retirements, as well as the implementation of the Affordable Care Act and Consensus Model for Advanced Practice Nursing. This third edition covers curriculum development and evaluation in detail and provides the knowledge and practical applications needed by new and experienced faculty to confidently embrace the academic role. With an emphasis on interdisciplinary collaboration throughout, the text focuses on the growth of simulation, guidance for new faculty transitioning from a clinical to academic role, developing curricula for practice and academic settings, program evaluation, accreditation activities, and recommendation for research in nursing education. Also addressed is the explosion of DNP programs across the country and its effect on practice and education, as well as the controversy surrounding the use of simulation. Chapter objectives, discussion points, learning activities, references and a glossary enhance learning and retention of material. The text is a valuable resource for CNE certification review. New to the Third Edition: New chapter: Role of Faculty in Curriculum Development and Evaluation New chapter: Financial Support and Budget Management for Curriculum Development New chapter: Research and Evidence-Based Practice in Nursing Education Emphasis on guiding the assimilation of new instructors into faculty roles of program and curriculum development, instructional design, and student evaluation New content on curriculum evaluation, financial support, and budget management Strong focus on Interdisciplinary Educational Collaboration throughout Addresses the need for preparing more faculty to educate thousands of new nurses as defined by the IOM Report, the Affordable Care Act, and the Consensus Model Instructor Materials including: PowerPoint slides, syllabi, teaching/learning strategies, learning activities and associated rubrics for grading.

The official TEAS manual written by the creators of the TEAS exam. This study manual directly aligns with the TEAS exam, giving you the preparation you need to achieve the highest score possible. Features: - New! Features full-length practice exam with an expectancy table that helps determine how prepared you are to take the TEAS exam - New! More practice questions with detailed answer explanations at the end of each chapter - Comprehensive end-of-section (Mathematics, Science, English and English language usage) quizzes with detailed answer keys - Updated testing-taking tips and strategies - The TEAS study manual directly aligned with the ATI TEAS exam blueprint The ATI TEAS Manual is designed to work in conjunction with our other TEAS Exam prep products include ATI TEAS SmartPrep and the ATI TEAS Online Practice Assessments.

Pamphlet is a succinct statement of the ethical obligations and duties of individuals who enter the nursing profession, the profession's nonnegotiable ethical standard, and an expression of nursing's own understanding of its commitment to society. Provides a framework for nurses to use in ethical analysis and decision-making.

Resources for teaching and learning are posted at tinyurl.com/Glanz4e and www.med.upenn.edu/hbhe4. This fourth edition of the classic book, Health Behavior and Health Education: Theory, Research, and Practice provides a comprehensive, highly accessible, and in-depth analysis of health behavior theories that are most relevant to health education. This essential resource includes the most current information on theory, research, and practice at individual, interpersonal, and community and group levels. This edition includes substantial new content on current and emerging theories of health communication, e-health, culturally diverse communities, health promotion, the impact of stress, the importance of networks and community, social marketing, and evaluation.

This volume reviews the public health concerns and challenges specific to the complex Arab world from a multidisciplinary perspective.

Review Guides/Certification Prep/Pocket Guides

The successful implementation of evidence into practice is dependent on aligning the available evidence to the particular context through the active ingredient of facilitation. Designed to support the widely recognised PARIHS framework, which works as a guide to plan, action and evaluate the implementation of evidence into practice, this book provides a very practical ' how-to ' guide for facilitating the whole process. This text discusses: undertaking an initial diagnosis of the context and reaching a consensus on the evidence to be implemented; how to link the research evidence with clinical and patients ' experience and local information in the form of audit data or patient and staff feedback; the range of diagnostic, consensus building and stakeholder consultation methods that can be helpful; a description of facilitator roles and facilitation methods, tools and techniques; some of theories that underpin the PARIHS framework and how these have been integrated to inform a revised version of PARIHS Including internationally-sourced case study examples to illustrate how the facilitation role and facilitation skills have been applied in a range of different health care settings, this is the ideal text for those interested in leading or facilitating evidence based implementation projects, from the planning stage through to evaluation.

With over 400 drug monographs, this book covers the technical, practical and legal aspects that you should consider before prescribing or administering drugs via enteral feeding tubes.
