Within today's multilingual communities, a growing percentage of students are emergent bilinguals--bringing to school a home language other than English and thus poised to become bilingual as they acquire the new language. As a result, school leaders need to have essential background knowledge and a wealth of strategies at their fingertips to ensure that all students are prepared for college, career, and civic engagement. In *Learning in a New Language*, author Lori Helman offers educational leaders a comprehensive and accessible guide to best practices for supporting students from culturally and linguistically diverse backgrounds in a school environment that embraces equity. Helman discusses:

*Changing demographics that require educational leaders to enlarge and enhance their approaches *The importance of engaging families in forming a cohesive school community that contributes to student success *Fundamental approaches to creating equity for linguistically diverse students in the school change process *The role of language in academic learning and what makes learning in a new language unique *Evidence-based strategies for literacy and content-area classrooms *Practical tips for where to start in supporting emergent bilinguals in the classroom, and presents dozens of online resources for further exploration. The responsibilities of educational leaders continue to expand as they work toward managing school sites and ensuring equity of student opportunity and achievement. Helman provides a one-stop resource for the foundational knowledge and practical guidance needed to strategically take on these responsibilities.

Mobile technologies combined with an interdisciplinary approach to knowledge and organization of learning experiences that are meaningful to children could create a creative and interactive learning environment different from that of traditional teaching. Making good use of mobile learning with appropriate devices will increase the learning motivations of the students and help them bring about positive performance. *Mobile Learning Applications in Early Childhood Education* is a collection of innovative research on the methods and applications of mobile learning techniques and strategies within diversified teaching settings. While highlighting topics including computational thinking, ubiquitous learning, and social development, this book is ideally designed for researchers, teachers, parents, curriculum developers, instructional designers, academicians, students, and practitioners seeking current research on the application of mobile technology within child education.
