Trump's Unfinished Business offers a prophetic template to change the face of politics & save the nation from moral rot & Civil War. In one book, you will find new applications of God's commands that can be used to break up the Tech Giants' monopoly, create a Digital Bill of Rights, reform Family Law, protect children, enshrine true equality, educate our youth, and deal sensibly with Climate Change. "We need pastors and preachers to read this book "Trump's Unfinished Business" and apply the Law of God correctly, and preach it again to America & the world." ALLAN PARKER President of The Justice Foundation, Lead counsel for Norma McCorvey (the "Roe" of Roe v. Wade) & Sandra Cano ("Doe" of Doe v. Bolton) "The insights of this book will provide hope for the future of America & preserve its calling as a lighthouse to the nations during our turbulent times." DR. DENNIS LINSAY CEO of Christ for the Nations "Steve Cioccolanti has nailed it with 'Trump's Unfinished Business.'... [He] is walking into the swamp with this book & showing us how to drain it!" JULIE DIEZ Paralegal "The vision contained in Steve Cioccolanti's book Trump's Unfinished Business is far-sighted, wide-reaching & convicting...Cioccolanti is offering the Body of Christ the clearest path to employing the Biblical template to unite us as a nation & avoid civil war." LORILYN ROBERTS Award-winning Author "Let me say Cioccolanti's "Trump's Unfinished Business" is truly excellent. Each chapter adds new insights...His analysis of the law is truly impressive & I particularly appreciate his proposals to improve the legal system & the broken family law court. I will be gladly passing this book around to my friends & esteemed colleagues. I highly recommend it." DR. AUGUSTO ZIMMERMANN, PhD Head of Law, Sheridan College, Perth "In this book, Steve Cioccolanti exposes what has gone wrong, and he recommends solid ideas on how to set them right.... by going back to what is taught in the Bible." RICH MARSH Ex-Navy, Career Consultant "Cioccolanti's book is clearly visionary...For too long, the Bible has been sidelined in education due to an erroneous application of the principle of 'separation of church and state.'" DR. JOHN MCELROY Director of Southern Cross Association of Churches "Steve Cioccolanti has taken up a subject which I believe is a first... His writing is very thought-provoking, creative and visionary... I would imagine the laws in this book will be very close to the ones Yeshua will set up for the world when He comes to reign... This much-needed book... has come at a time with the Republic of the United States is fighting for its life." SHIRA SORKO-RAM Pioneer of the Jewish Messianic movement in Israel since 1967 "Trump's Unfinished Business will serve as a template for all leaders whether they are in the US, Australia or Korea. I would like to see it made available to voters before major elections. I am really amazed by Steve Cioccolanti's insights into the American cultural war. His coverage of many subjects is very deep. I find the techniques that American leftists use to distort facts and the truth are also used here in South Korea...This book is a great opportunity to problem solvers to learn how God's principles work in human society." ASSOC. PROF. I-SOO JOE Handong Global University, School of Management & Economics, South Korea

The Economics of Alfred Marshall brings together a number of leading international scholars for a timely reappraisal of Marshall's contribution to the development of economics. The aims of the contributors are firstly to revisit the work of Alfred Marshall and to investigate the unity of his projects, which contemporary authors often tend to underestimate; and secondly to show how Marshall's approach is not only a subject for historians of economic thought, but may also provide a message that is relevant for the progress of economics.

Although materials play a critical role in electronic packaging, the vast majority of attention has been given to the systems aspect. *Materials for Electronic Packaging* targets materials engineers and scientists by focusing on the materials perspective. The last few decades have seen tremendous progress in semiconductor technology, creating a need for effective electronic packaging. *Materials for Electronic Packaging* examines the interconnections, encapsulations, substrates, heat sinks and other components involved in the packaging of integrated circuit chips. These packaging schemes are crucial to the overall reliability and performance of electronic systems. Consists of 16 self-contained chapters, contributed by a variety of active researchers from industrial, academic and governmental sectors. Addresses the need of materials scientists/engineers, electrical engineers, mechanical engineers, physicists and chemists to acquire a thorough knowledge of materials science. Explains how the materials for electronic packaging determine the overall effectiveness of electronic systems.

*How Cool Are Penguins* is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

This book describes nuclear magnetic resonance (NMR) methods which are used to study translational dynamics of molecules in different complex systems including systems made of synthetic and natural polymers, tissues and the porous heterogeneous systems of different types, such as cement and wood. The results of proton spin-lattice and spin-spin relaxation, cross-relaxation, pulse field gradient (PFG) NMR in studying diffusion properties and dynamics of molecules in polymer systems of different complexity are reported. In addition to these methods, reports on the use of the double-quantum-filtered (DQF) NMR technique in a study of slow molecular dynamics and properties of systems with anisotropic properties, such as water in hardening cement pastes, are presented. The book also covers applications of one and two dimensional NMR techniques. This book is a useful reference for readers learning different NMR techniques and their applications in civil engineering and biochemistry.

This book analyses the development of geography as a scientific discipline in Brazil, highlighting how the established partnerships with French geographers have helped shape scientific progress in the country. It connects economic development and politics with the study of geography in Brazil. The author, José Borzacchiello da Silva, includes interviews with renowned French geographers, documenting their insight into the French contribution to geography in Brazil. The research partnerships established have been significant to the foundation and growth of the discipline in the country.

An anthology of erotic short stories, poems, musings and artwork by women and a non-binary gender person.

With the increasing demand for smaller, faster, and more highly integrated optical and electronic devices, as well as extremely sensitive detectors for biomedical and environmental applications, a field called nano-optics or nano-photonics/electronics is emerging – studying the many promising optical properties of nanostructures. Like nanotechnology itself, it is a rapidly evolving and changing field – but because of strong research activity in optical communication and related devices, combined with the intensive work on nanotechnology, nano-optics is shaping up fast to be a field with a promising future. This book serves as a one-stop review of modern nano-optical/photonic and nano-electronic techniques, applications, and developments. Provides overview of the field of Nano-optics/photonics and electronics, detailing practical examples of photonic technology in a wide range of applications. Discusses photonic systems and devices with mathematical rigor precise enough for design purposes. A one-stop review of modern nano-optical/photonic and nano-electronic techniques, applications, and developments.
