The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical

evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

The Sixth Edition of *Essential Lawyering Skills: Interviewing, Counseling, Negotiation, and Persuasive Fact Analysis* continues to emphasize the role of the attorney in the lawyer-client relationship. Widely respected practitioners and teachers, the authors' introductions, visual aids, and realistic examples illuminate the basic mechanics of these key skills. Case situations and problem-solving scenarios engage students in developing essential lawyering skills that mirror legal practice. The topic of professional responsibility is integrated throughout. New to the Sixth Edition: New co-author Renée Hutchins brings her new perspective to the course Updated and improved design makes the material more accessible for today's student Increased coverage of negotiation in the plea-bargaining context Updated examination of the use of electronic media in fact analysis and negotiation Professors and students will benefit from: An emphasis on practice and the mechanics of negotiation and persuasion, rather than on theory Complete coverage of problem solving, interviewing, counseling, negotiation, and fact analysis Remarkably clear and penetrating discussion of the persuasive value of facts, supported by useful visual aids Generous use of interesting examples that place topics in context Integrated coverage of professional responsibility where appropriate Experienced authors, who draw upon many years of teaching and writing about lawyering skills

Dispute Resolution: Beyond the Adversarial Model, Third Edition provides a comprehensive look at the current state of ADR. For each area of Negotiation, Mediation, Arbitration, and Hybrid processes, the text incorporates four key aspects: the theoretical framework defining the process; the skills needed to practice it; the ethical issues implicated in its use and how to counsel users of such processes; and legal and policy analyses, with questions and problems within the text. New to the Third Edition: A shorter, more compact book designed to be student-friendly Exercises and discussion problems throughout Designed for one chapter to be covered each week of a typical ADR course The latest on Online Dispute Resolution, Dispute System Design, Supreme Court decisions on arbitration, and empirical work on mediation and negotiation Professors and students will benefit from: Comprehensive, current coverage. The theory, skills, ethical issues, and legal and policy analyses relevant to all key areas of contemporary ADR practice—Negotiation, Mediation, Arbitration, and hybrid and multi-party processes and their appropriate uses—are thoroughly covered using a rich range of up-to-date cases and readings. Authored by the leading scholars and teachers in the field of Dispute Resolution. The authors are award winning and recognized for their scholarship, teaching, practice, policy making, and standards drafting throughout the wide range of particular ADR processes. Practical approach to problem-solving. The text engages students as active participants in resolving human and legal problems, using individual or combined resolution processes in varying gender, race, and cultural contexts. International and multi-party dispute resolution. These important, high-interest contexts and applications are thoroughly covered in discrete chapters. Readings balance theory and theory-in-use. Readings include cases, behaviorally and critically based articles, examples, empirical studies, and relevant statutory and other regulatory material to illuminate the challenge of balancing rules and laws with the economic and emotional constraints inherent in disputes. Challenging, relevant readings. The text includes a wide range of perspectives, from Fisher, Ury, and Patton's *Getting to Yes*, Raiffa's *Art and Science of Negotiation*, and materials on modern deliberative democracy, group facilitation and decision making, counseling clients about uses of ADR, enforcement of negotiation, and mediation agreements. Key cases include *AT&T v. Concepcion* and other recent Supreme court cases on arbitration. Teaching materials include: Numerous role-plays and simulations for skills development Suggested teaching exercises, syllabi and "answers" to problem boxes found in text Recommendations for supplemental materials, such as videos and transcripts Examination and paper suggestions for each chapter
