This book has

first aim is to
contribute to a
more productive
debate between
different

There is
surprisingly
little

theoretical and

debate in this
burgeoning

field, which is
one major reason
for the failure

to fully grasp
the diversity of
today's interreg

often theorists
speak past each
other, without

really engaging

with alternative
theoretical

perspectives or

competing

research

results. Indeed,

this book

constitutes the

first systematic

attempt to bring
together leading
theories and
theorists of int

Leading scholars
from around the

their own
distinctive
theoretical

perspectives on

emphasis on the

. These highly

theorists have
all been
associated over
the years with a
variety of

disciplines,

institutions,

schools and

debates and so

bring a rich set

of insights and

connections to

this pioneering

project. The

second part of

the book

'unpacks' and

problematizes

the region, the

is a strong
