Nursing

The Future of
Nursing explores
how nurses'

Page 55/105

File Type PDF

Jcaho

roles, responsibilities, and education should change

significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's

File Type PDF

Jcaho

increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering

File Type PDF

Jcaho

mandatory care as
a profession.
Nurses therefore
have valuable
insights and
unique abilities
to contribute as
partners with
other health
care
professionals in
improving the
quality and
safety of care

File Type PDF

Jcaho

as envisioned in the Affordable Home Health Care Act (ACA) Annual enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States.

File Type PDF

Jcaho

To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020,

File Type PDF

Jcaho

and double the number who pursue doctorates.

Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health

File Type PDF

Jcaho

system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for

nursing.
