YouTube Description - Hermes thrice-great, the Messenger of the Gods and Greek reincarnation of Thoth presents his "lament", which reads like a prophecy, telling of a time of cultural disease that will be wiped clean to begin anew. Much like many prophecies around today including the 2012 Mayan date, this one from ancient Egypt appears to apply to our time, giving us reason to reevaluate our present.

Lament of Hermes by Hermes Trismegistus - Goodreads

Hermes Trismegistus may be associated with the Greek god Hermes and the Egyptian god Thoth. Greeks in the Ptolemaic Kingdom of Egypt recognized the equivalence of Hermes and Thoth through the interpretatio graeca. Consequently, the two gods were worshiped as one, in what had been the Temple of Thoth in Khemenu, which was known in the Hellenistic period as Hermopolis.

The Asclepius is one of two philosophical books ascribed to the legendary sage of Ancient Egypt, Hermes Trismegistus, who was believed in classical and renaissance times to have lived shortly after Moses. The Greek original, lost since classical times, is thought to date from the 2nd or 3rd century AD. However, a Latin version survived, of which this volume is a translation. Like its companion, the Corpus Hermeticum (or The Way of Hermes), the Asclepius describes the most profound philosophical questions in the form of a conversation about secrets: the nature of the One, the role of the gods, and the stature of the human being. Not only does this work offer spiritual guidance, but it is also a valuable insight into the minds and emotions of the Egyptians in ancient and classical times. Many of the views expressed also reflect Gnostic beliefs which passed into early Christianity.

This is the edition including all three books. The so-called Hermetic writings have been known to Christian writers for many centuries. The early church Fathers (Justin Martyr, Tertullian, Clement of Alexandria) quote them in defense of Christianity. Stobaeus collected fragments of them. The Humanists knew and valued them. They were studied in the sixteenth and seventeenth centuries, and in modern times have again been diligently examined by many scholars. G. R. S. Mead has issued a translation of the whole body of extant literature, with extended prolegomena, commentary, etc. There is a wide difference of opinion as to the date at which this literature was produced. Mead believes that some of the extant portions of it are at least as early as the earliest Christian writings, while von Christ assigns them to the third Christian century, and thinks that they show the influence of neo-Platonism. To affirm that they influenced New Testament usage would be hazardous, but they perhaps throw some light on the direction in which thought was moving in New Testament times.

The Corpus Hermeticum is one of the primary works within the Hermetic Tradition. This Renaissance era craft is nonetheless based upon philosophical materials from far older times, namely the third or fourth century AD, from which the primordial material came. Credited to Hermes Trismegistus, the Divine Pymander (sometimes spelled "Poemander") touches upon astronomy, science, nature, and a great deal of theological material. It is presented in the form of discourse; a format which will be familiar to anyone also familiar with Plato's "Republic" and some similar philosophical works of antiquity. Through his discourse with several individuals, Trismegistus attempts to draw upon the overarching philosophy "as above, so below." Thus then, this work describes the very process and ideation behind all of existence, the purpose of life, and the nature of good and evil, all through its treatises upon various topics.

The Kybalion: A Study of the Hermetic Philosophy of Ancient Egypt and Greece is a book originally published in 1908 by New Thought author William Walker Atkinson under the pseudonym "The Three Initiates". This book is not exactly The Kybalion itself, it is more of a critical interpretation by Atkinson on hermetic philosophy. As such, it should be read with this in mind that it is not an authoritative hermetic text, but one only dedicated to Hermes Trismegistus. The Kybalion presents seven universal principles it proposes to be the Seven Hermetic Principles: Mentalism, Correspondence, Vibration, Polarity, Rhythm, Cause and Effect, and Gender. These principles are essentially explications of cycles, and before these principles is the notion of the primacy of mind as the cause of All (philosophical mentalism). This idea of mentalism is inspired by what is written about the Mind in The Hermetica. Coinciding with Spiritualism, New Thought, and Theosophy, the book became very popular in New Age movements, particularly with its notion of spiritual and mental alchemy. The Kybalion is a text which must be read with this in mind, while it is an interpretation of hermetic philosophy, it is in part still a relic of its time. Its influence cannot be understated, and the need to read it critically cannot be overstated.

This translation (taken From 'Thrice Greatest Hermes: Studies In Hellenistic Theosophy And Gnosis, Volume 2'), includes the Pœmandres and some addresses of Hermes to disciples Tat, Ammon and Asclepius, which are said to have originated in the school of Ammonius Saccas, a Greek philosopher from Alexandria.

Anthologizes verses by women ranging from Enheduanna, a second millennium B.C. Sumerian princess, to the medieval poets Marie de France and Florencia de Pinar, to noteworthy poets of the nineteenth and twentieth centuries

The Corpus Hermeticum is a collection of short philosophical treatises, a powerful fusion of Greek and Egyptian thought, written in Greek in Alexandria between the first and third centuries AD and rediscovered in the West in the fifteenth century when it was first translated into Latin by the great scholar and philosopher Marsilio Ficino. These writings were believed from antiquity up to the early seventeenth century to be the writings of Hermes Trismegistus, 'thrice-great Hermes', the name given by Greeks of the classical and Hellenistic periods to the Ibis-headed Egyptian god Thoth. They were central to the spiritual work of Hermetic societies in late antique Alexandria, aiming to awake gnosis, the direct realisation of the truth of the identity of the individual and the Supreme, and are still read as inspirational writings today.

Herodotus was an ancient Greek historian who lived in the fifth century BC (c.484 - 425 BC). He has been called the "Father of History", and was the first historian known to collect his materials systematically, test their accuracy to a certain extent and arrange them in a well-constructed and vivid narrative. The

Histories-his masterpiece and the only work he is known to have produced-is a record of his "inquiry", being an investigation of the origins of the Greco-Persian Wars and including a wealth of geographical and ethnographical information. The Histories, were divided into nine books, named after the nine Muses: the "Muse of History", Clio, representing the first book, then Euterpe, Thaleia, Melpomene, Terpsichore, Erato, Polymnia, Ourania and Calliope for books 2 to 9, respectively.
