Comprehensive yet easy to read, Pharmacology: Principles and Applications, 3rd Edition introduces you to basic pharmacology, showing how to apply principles to the kinds of clinical situations you will encounter on the job. You'll learn how different drugs work in the body, how to calculate drug dosages, drug administration routes and procedures, the medications related to disorders in each body system, and much more. Written by expert authors Eugenia M. Fulcher, Robert M. Fulcher, and Cathy Dubeansky Soto, Pharmacology ensures that you master all of the pharmacology competencies required by CAAHEP and ABHES. In the book and on a companion Evolve website, a variety of exercises helps you strengthen your skills in math, dosage calculation, and critical thinking. Practical coverage of basic pharmacology provides a thorough understanding of the medications most commonly used in ambulatory and inpatient settings. A real-life Scenario starts each chapter with thought-provoking questions to consider as you progress through the material. Procedures boxes provide step-by-step guidance for drug calculation and administration, accompanied by numerous illustrations and icons that identify OSHA-mandated protocols. Common Signs & Symptoms of Diseases and Common Side Effects of Medications lists in each body system chapter help you distinguish between disease progression and medication reactions. Body systems icons highlight the ways that specific drugs affect a particular body system. Chapter objectives and key words at the beginning of each chapter help you focus your study efforts. Check Your Understanding math review sections enable you to assess your knowledge of application and calculation concepts. Critical Thinking exercises challenge you to apply what you've learned to a variety of realistic situations. Important Facts and Clinical Tips boxes in each chapter highlight the key concepts for practice. Patient Education for Compliance boxes help you communicate more effectively with patients about possible side effects or adverse reactions. Summary tables are more concise and easier to follow. New calculations exercises and quizzes are included on the companion Evolve website. Expanded math and drug calculation sections in the workbook supplement the textbook with additional exercises for practice with math and dosage calculations. Available separately.

Better than fireworks, this classic Beginner Book edited by Dr. Seuss celebrates all the wonderful things that come with summer! From trips to the beach and eating watermelon to fireworks and fishing, Alice Low and Roy McKie's Summer will have young readers eager for the kind of fun only warm breezes and sunny weather can bring. Originally created by Dr. Seuss, Beginner Books encourage children to read all by themselves, with simple words and illustrations that give clues to their meaning.

The aim of this book is to enable the student to read, write, and speak acceptable Israeli Hebrew and to understand less complex biblical Hebrew. A unique feature is the author's use of the principles of structural analysis. For students who are not acquainted with a language other than English, he elucidates those features of the language that are unfamiliar in the structure of English. The student is trained, from the first, to read "unvocalized" script as the native reader does, and "reading clues" (word and phrase patterns) are provided for this purpose. The work is organized into sections that can be worked through in an academic year--presentation of features, text samples, exercises, grammatical synopses, and individual and comprehensive glossaries. This text may be used by teachers without specialized training in linguistics. It can be used by self-teaching students as well as by those at college level, and it will valuable for immigrants to Israel.

The Clavis or Key to the Magic of Solomon is one of several notebooks from the estate of Ebenezer Sibley, transcribed under the direction of Frederic Hockley (1808-1885). Sibley was a prominent physician and an influential author, who complemented his scientific studies with writings on the adeeper truths including magic, astrology, alchemy, and hypnotherapy. Both Sibley and Hockley were major inspirations in the occult revival of the past two centuries, influencing A.E. Waite, S.L. Mathers, Aleister Crowley, as well as the Golden Dawn, Rosicrucian, and Masonic movements. This collection reflects Sibley's teachings on the practical use of celestial influences and harmonies. The Clavis contains clear and systematic instructions for constructing magical tools and pentacles for many practical purposes. It includes eight separate magical texts: The Mysterious Ring, Experiments of the Spirits, Birto, Vassago, Agares, Bealpharos, The Wheel of Wisdom, and the Complete Book of Magic Science. The manuscript reproduced here is the most accurate and complete known, very beautifully and carefully written complete with extraordinary hand-colored seals and colored handwritten text. 282 color pages with a color fold-out and a huge index.
