Android on x86: an Introduction to Optimizing for Intel® Architecture serves two main purposes. First, it makes the case for adapting your applications onto Intel’s x86 architecture, including discussions of the business potential, the changing landscape of the Android marketplace, and the unique challenges and opportunities that arise from x86 devices. The fundamental idea is that extending your applications to support x86 or creating new ones is not difficult, but it is imperative to know all of the technicalities. This book is dedicated to providing you with an awareness of these nuances and an understanding of how to tackle them. Second, and most importantly, this book provides a one-stop detailed resource for best practices associated with the installation issues, hardware optimization issues, software optimization issues, and performance optimizations that emerge when developers consider the x86 Android devices. Optimization discussions dive into native code, hardware acceleration, and advanced profiling of multimedia applications. The authors have collected this information so that you can use the book as a guide for the specific requirements of each application project. This book is not dedicated solely to code; instead it is filled with the information you need in order to take advantage of x86 architecture. It will guide you through installing the Android SDK for Intel Architecture, help you understand the differences and similarities between processor architectures available in Android devices, teach you to create and port applications, debug existing x86 applications, offer solutions for NDK and C++ optimizations, and introduce the Intel Hardware Accelerated Execution Manager. This book provides the most useful information to help you get the job done quickly while utilizing best practices. What you’ll learnThe development-relevant differences between Android on ARM and Android on Intel x86 How to set up the SDK for an emulated Intel Android device How to build the Android OS for the Intel Mobile Processor How to create new x86 based Android applications, set up testing and performance tuning, and port existing Android applications to work with the x86 processor How to debug problems they encounter when working on the x86 Android test platform Intricacies of the Intel Hardware Accelerated Execution Manager. The reader will also gain significant insight into the OpenGL Android support. The land of nature all around us has a beauty and charm all on its own. The grandeur of the variety of trees, flowering shrubs, with all shades of green grasses growing in open spaces is a picture to behold. The quiet noise of the babbling and flowing clear brook waters intermingled with the chirping sounds of a wide variety of meadow birds serves as a beautiful chorus of spectacular musical blends. And then with this picture as the backdrop, added is the graceful appearance of the full range of wild life animals of all ages, in their natural surroundings and thriving habitat. The picture is breathtaking! There is mother rabbit and her very young, gray squirrel and her family, mother groundhog and her newborn babies, mother duck and her very young flock of ducklings, busy multicolored chipmunks gathering food for their family dinner, as well as other wildlife of nature’s pride. They are all busily engaged in their daily tasks. This is the setting for this story, which takes place in the land of nature. This story will thoroughly captivate the attention of those who read it. And the readers heartstrings of thoughtful emotion will be moved by the dramatic events of this during one season of the life of nature’s pride and joy. What a lasting impact will be yours at whatever age you happen to be as you read this story. The Land of Nature!

The rise of Chinese female athletic participation and success in international competitions has become the backbone for China’s rise to sports relevance, and has been unlike historical Western nation-states’ experience in athletics. This historical examination chronologically documents the rise of Chinese elite female athletes and the policies affecting athletes from 1949 to the present, and reveals a connection between female athletic success and state enforced gender equality policies that targeted culture, education, and labor. Through gender equality policies, men and women were uniformly exposed to a national sports system that invested in research, training, equipment, recruitment, and incentivizing athletes “to win honors for the country.” Moreover, this examination evaluates various hypotheses on what Chinese policies, if any, have produced these extraordinary results, and proposes the sports system, although exceptionally successful, is ultimately imbalanced and plateauing, while the Chinese Communist Party desires participation, power, and control at the expense of possible broad athletic victory.

Future mobile access networks will require upgraded telecommunications networks; 3G LTE/ SAE is the next step, allowing data rates above 100 Mbps. Telecommunications engineers will need to understand the new SAE/ EPC architecture and its tendency towards automatic configuration, but the complexity, length and dryness of the standards documents make it difficult for them to find the information they need and work out how to apply it to their daily product and network development. This book - a new edition of SAE and the Evolved Packet Core - provides clear, concise and comprehensive coverage of the entire SAE/ EPC architecture, explaining concepts and standards and how they are used in commercial service settings. More than just a précis of the standards, it gives real insight into their development and the real-world scenarios in which they have been used since the publication of the first edition. This second edition places more emphasis on key aspects such as mobile systems and protocols (Diameter, GTP, S1-AP), and includes new coverage of femtocells, SIP/TO, LIPA, LTE relay and LTE Advanced. Up-to-date coverage of SAE including the latest standards development Easily accessible overview of the architecture and concepts defined by SAE Thorough description of the Evolved Packet Core for LTE, fixed and other wireless accesses Comprehensive explanation of SAE key concepts, security and Quality-of-Service Covers potential service and operator scenarios including interworking with existing 3GPP and 3GPP2 systems Detailed walkthrough of network entities, protocols and procedures Written by established experts in the SAE standardization process, all of whom have extensive experience and understanding of its goals, history and vision

‘t all began in Cambridge. We were gathered there for the Alumni Weekend, when a thousand elderly graduates return to hear lectures from the great minds of the 21st century.’ This sets Nott pondering his own mortality, the environment, but more importantly, climate change. Will the gloom mongers be proved right? This is serious stuff, but quickly spirals into fantasy. A mixture of fact, fantasy, imagination and truth, Sir John’s writing is extremely funny: one premised on a serious subject but written with an ironic, irreverent twist.

An illuminating portrait of contemporary Japan by the Asia editor of the Financial Times bases his observations on a cross-section of Japanese citizenry while evaluating such major events as the World War II atom bombings, the 1990 economic recession and the earthquake, tsunami and nuclear meltdown disasters of 2011.

Lil Ren the Mouse doesn't like trouble. He is bullied but he is keeping it a secret. Instead of telling his friends, he moves to a cozy house on an island. Big Ben the Cat follows him, sneaking in windows and unlocked doors, setting traps all over the place, disturbing the little mouse. Then, one day, a storm starts to brew, and there's a flood. Lil Ren gathers his wood, nails and hammer, hoping to make a strong boat to hold his buddies, even Big Ben. The cat laughs and points his finger at the little mouse as he hammers away! Silly Ben called out to his little buddy, "Come and see this silly fuddy-duddy! A bit of rain and he has already begun Building a boat instead of having fun." Did Cat wake up and get wise like Lil Ren the mouse?
