The Skills Balancing Act in Sub-Saharan Africa

ACDC Principles and Applications teaches learners how to apply basic laws and analysis techniques to traditional introductory circuits, as well as popular, real-world AC and DC circuits. AC/DC Principles combines standard theory of electricity with fundamentals of electronics and demonstrates electronic theory as applied to actual applications. Throughout the book, only those circuit theorems and analysis techniques that are practical and typically used in real-world circuit analysis are addressed. In addition, Kirchhoff's current law, Kirchhoff's voltage law, Thevenin's Theorem and Ohm's law are introduced to ensure that the learner has a complete understanding of each law before attempting to apply all or part to traditional series and parallel circuits.

Unemployment and underemployment are global development challenges. The situation in Ghana is no different. In 2016, it was projected that, given the growing youth population, 300,000 new jobs would need to be created each year to absorb the increasing numbers of unemployed young people. Yet the structure of the Ghanaian economy in terms of employment has not changed much from several decades ago. Most jobs are low skill, requiring limited cognitive or technology know-how, reflected by low earnings and less decent work. An additional challenge for Ghana is the need to create access to an adequate number of high-quality, productive jobs. This report seeks to increase knowledge about Ghana's job landscape and youth employment programs to assist policy makers and key stakeholders to identify ways to improve the programming and effectiveness of youth employment programs and to strengthen coordination among major stakeholders. Focused, strategic, short-to-medium and long-term responses are required to address the current unemployment and underemployment challenges. Effective coordination and synergies among youth employment programs are needed to avoid duplication of efforts while transformation of the country's economic structure is improved. Effective private sector participation in skills development and employment programs is suggested. The report posits interventions in five priority areas, which are not new but could potentially be impactful through scaling up. These areas include: (1) agriculture and agribusiness promotion; (2) apprenticeship (skills training); (3) entrepreneurship promotion; (4) high-yielding areas (renewable energy-solar, construction, tourism, sports, and green jobs); and (5) pre-employment support services Finally, with the fast-changing nature of work due to technology and artificial intelligence, Ghana needs to develop an education and training system that is versatile and helps young people to adapt and thrive in the 21st century world of work.

No beginner should be without this book. Paper patterns often give insufficient information, but here clear diagrams and detailed step-by-step instructions provide a method of working which is easy to follow. This comprehensive and practical book covers every aspect of making your own clothes from choosing machines, tools and equipment to the various stitches and hem finishes. Clear drawings illustrate the techniques needed to become a proficient dressmaker.
