But interpretivist sociologists are interested in the subjective views and interpretations of their subjects, believing that it is impossible to objectively establish social facts. Nonetheless, most would still urge sociologists to be objective in their research, even though postmodernists argue that all research is inevitably subjective.

Objectivity and subjectivity are key concepts in social research. This book, written by leading authors in the field, takes a completely new approach to objectivity and subjectivity, no longer treating them as opposed - as many existing texts do - but as logically and methodologically related in social research. The book debates:

~~Objectivity and Subjectivity in Social Research | SAGE ...~~

Defining objectivity and subjectivity. The concepts of objectivity and subjectivity are typically defined relative to each other: if something is not objective, then it is subjective. They have a surprisingly varied history, as shown in Daston and Galison's (2007) study. Although objectivity is now strongly associated with science, Daston and Gallison date its emergence as a scientific term as late as the mid-nineteenth century, long after the scientific revolution of the seventeenth century.

~~Why We Should Stop Talking About Objectivity and ...~~

The objective information about real things which social and subjective processes (including measurement) generate is reflected in real results such as producing nuclear weapons, which really kill people, and medical procedures, which really cure disease (cf. MERTON, 1972 for an incisive refutation of the subjectivist position that one's values insulate oneself from the world).

Objectivity and value-freedom versus subjectivity Subjective, personal feelings should be kept out the scientific process. Scientific knowledge should not be influenced by the personal opinions or biases of the researchers who conduct the experiments which provide the data to generate scientific knowledge.

~~subjectivity — ReviseSociology~~

One of the more important debates concerning objectivity in the social sciences concerns the role value judgments play and, importantly, whether value-laden research entails claims about the desirability of actions. Max Weber held that the social sciences are necessarily value laden.

~~Max Weber and Objectivity in the Social Sciences — Objectivity~~

Objectivity is a frame of mind so that personal prejudices, preferences or predilections of the social scientists do not contaminate the collection of analysis of data. Thus scientific investigations should be free from prejudices of race, color, religion, sex or ideological biases.

~~Problems of Objectivity, Research Methods and Statistics~~

Thus, failure of objectivity in social inquiries is often attributed to the simple fact that the social scientist as a social being is also actively participating in social affairs. In answering this objection, That the biologist is himself an organism and a physicist also a body of given mass, interacting with other organisms and bodies.

~~The Problem of Objectivity in Social Inquiry~~

An objective statement is based on facts and observations. On the other hand, a subjective statement relies on assumptions, beliefs, opinions and influenced by emotions and personal feelings. Objective information is provable, measurable and observable. In contrast, subjective information is relative to the subject, i.e. the person making it.
