The practice of primary health care has expanded beyond the "traditional" medical model. Primary-care physicians and allied professionals are called upon more frequently to address parental concerns about developmental delays, poor school performance, or behavioral problems. As a result, pediatricians, family practitioners,

pediatric nurses, social workers, and
speech language specialists are faced with
the issue of developmental and
psychological testing. The degree of the
clinician's involvement in testing varies
from interpretation of reports to
performing screening or assessments. In
many cases, the primary health care

disciplines such as child psychiatrists or psychiatric social workers sometimes are overwhelmed. The purpose of this book, therefore, is to provide the clinician with practical information regarding developmental and psychological testing, thereby making the health care professional an "educated consumer."
