Paul Caffyn ONZM is a sea kayaker based on the west coast of New Zealand. He has completed a number of supported, unsupported, solo and group expeditions by sea kayak in various locations around the world. He has been described as follows by John Dowd: Amongst sea kayakers Paul Caffyn is almost in a class of his own. For the longest time after he finished his awesome solo circumnavigation of Australia the silence was deafening: few of his peers knew the significance of what he had done, and perh

Originally penned by the late Derek C. Hutchinson, an international authority on sea kayaking, it describes equipment, basic and advanced techniques, weather and navigation, and is illustrated throughout by the author's own drawings and color photographs. This new 40th anniversary edition has been completely updated in line with the latest sea kayaking developments by Wayne Horodowich, a longtime friend of Hutchinson's and the founder of University of Sea Kayaking.

Recommends kayak routes along the coastal waters of New York, New Jersey, Delaware, Maryland, and Virginia, offers advice on planning a kayak trip, and includes tips on equipment and safety

Coast and of the sport who is also a highly respected coach in this field. Gordon Brown is a BCU Level 5 sea coach based on the Isle of Skye, Scotland. He shares his knowledge with you in his own succinct humorous style and very visual approach. In this book Gordon covers topics of kayaking history, physiology, boat and paddle dynamics, seamanship and navigation, safety and rescue, weather forecasting, caves, rockhopping and tidal races, expeditions and overnighting, as well as a wealth of tips and resources for the sea paddler. This is a visually stunning book printed on 170gsm silk paper filled with top quality photographs. Over seventy photographs and illustrations help to make this an essential modern manual for the sea kayaker.

Coast and the New York City area. And it showcases 50 of the very best. It is a diverse selection, too. After all, according to skill level, weather, personal mood, and other factors, a paddler may want open, fast water one day, but a quiet, protected experience at another time, and something in-between later on. It's all here, from New York City to the far eastern tip of Long Island's Montauk Point. What's more, the book's guidance and language are geared to wide-ranging skill levels: the novice will be enlightened and encouraged, and the seasoned kayaker or canoeist will be engaged and engrossed. That is because the author's intimate, lifelong knowledge of the area's waterways shines in his descriptions of natural and social histories, humorous stories, personal anecdotes, and beautiful black-and-white photographs. For example, among the 50 entries, the author tells of Cold Spring Harbor, nestled

Coast and between Oyster Bay and Huntington, and steeped in maritime history. He gives some back story on Little Neck Bay, home to littleneck clams but also where he says you will likely see a fin flip or a tail splash as the striped bass catch their prey. And he will take you to Setauket Harbor and tell you why it's his personal paddling favorite. But not all waxes euphoric, as there are practical considerations when striking out on water, and this guidebook is a good friend to have along. It describes the best times to paddle the 50 harbor, inlet, bay, and river routes; alerts readers to each paddle's difficulty level and estimated length; and suggests side trips, optional trip extensions, and alternate routes to paddle depending on weather conditions. Easy-to-follow maps, complete with GPS coordinates and driving directions, add to this book's high value. In addition, the author provides contact

throughout with excellent diagrams and drawings. The aim of this book is to provide a concise manual of navigation aimed specifically at sea kayakers. It covers what sea kayakers need to know and are likely to use; no more, no less. I have decided not to include a glossary as all the terms are explained in the book. To that end there is a comprehensive index. The ultimate test of whether or not the lessons have been absorbed is the first time you plan and execute a trip relying on your own navigation. Take precautions: Plan simple trips, and aim for big targets to start with. Get someone more experienced to check your calculations. Always take into account the weather forecast. Base your planning on the abilities of the weakest members of your group. Build up slowly. Enjoy the book and enjoy your paddling
