The 7 Key Principles to achieving YOUR business and life goals What could a graffiti artist, eminent neurologist, star athlete, celebrity chef, fashion designer, rocket scientist, and Grammy Award-winning musician possibly have in common? In this groundbreaking new book, Rana Florida shares their formula, giving you the tools to achieve unimaginable success in work and life. Upgrade gathers the best practices, not just from CEOs and business executives but from entrepreneurs, innovative thinkers, and creative leaders. Upgrade includes interviews with Sir Ken Robinson, Dan Pink, Mark Cuban, Andre Agassi, Kenny Scharf, Zaha Hadid, Governor Martin O'Malley, Tory Burch, Tim Brown, and many other leading figures. Despite this cast's vastly different backgrounds and skills, Florida's research concludes that there are seven key principles to achieving your business and life goals: Envision the future Find your passion Get creative Design your time Collaborate Take

risks Embrace failure Unfortunately, this is exactly what the majority of us don't do. Instead of developing a real strategy to upgrade and optimize our lives, too many of us just slog through life in a state of "managed dissatisfaction." But it's never too late to envision an entirely different future—or to actively upgrade your life. It's not about finding more time, money, or resources. Anyone can do it. This smart and entertaining guide delves deep into each principle, giving you the insights, tools, and inspiration to take your life from ordinary to extraordinary. Praise for Upgrade

"Why ride in coach, when you can upgrade? A must-read for a better journey through life." The Resilience Institute surveyed over 20,000 people to understand what drives resilience in individuals and groups across the world. 11 key factors were identified. These range from the obvious - focus, purpose, optimism, assertiveness and bounce - to the less expected - sleep quality, vitality, presence, decisiveness, values alignment and fulfilment. A resilient person breaks down life's challenges into achievable tasks, prepares biology and environment, then works with focus and determination. Things go wrong for them as for any of us, but they rely on their ability to bounce, recalibrate and recover. They engage with their whole being: physical, emotional and cognitive, dynamically playing to their strengths and

working to mitigate risk areas. Resilience Mastery examines each of the 11 key factors, weaving together inspiring stories from people who have achieved success in their fields. The book suggests that, as a species, we are using outdated hardware in an upgraded environment. We're easily swayed by groupthink and clever marketing. Food scientists have discovered bliss points that make manufactured food irresistible. Behavioural scientists and UX designers have discovered technology bliss points that addict us to devices. At the core of our nervous system lies a freeze, fight and flight response. None of these help us in a brave new world. To be effective and to reach our dreams we need presence, purpose, vitality and focus. We need to upgrade the quality of the challenges we tackle so that we can align our actions with our values and purpose. We need to master skills that will enable us to live a life of vitality and, ultimately, reach our potential.

How can educators leverage neuroscience research about how the human brain learns? How can we use this information to improve curriculum, instruction, and assessment so our students achieve deep learning and understanding in all subject areas? Upgrade Your Teaching: Understanding by Design Meets Neuroscience answers these questions by

merging insights from neuroscience with Understanding by Design (UbD), the framework used by thousands of educators to craft units of instruction and authentic assessments that emphasize understanding rather than recall. Readers will learn - How the brain processes incoming information and determines what is (or is not) retained as long-term memory; - How brain science reveals factors that influence student motivation and willingness to put forth effort; - How to fully engage all students through relevance and achievable challenge; - How key components of UbD, including backward design, essential questions, and transfer tasks, are supported by research in neuroscience; - Why specific kinds of teaching and assessment strategies are effective in helping students gain the knowledge, skills, and deep understanding they need to succeed in school and beyond; and - How to create a brain-friendly classroom climate that supports lasting learning. Authors Jay McTighe and Judy Willis translate research findings into practical information for everyday use in schools, at all grade levels and in all subject areas. With their guidance, educators at all levels can learn how to design and implement units that empower teachers and students alike to capitalize on the brain's tremendous capacity for learning.
