About - CIRIA

Given this context, the aim of CIRIA's recent report, Assessment and management of unexploded ordnance (UXO) risk in the marine environment (C754), is to set out guidelines that will address possible UXO threats at the outset of a project, thus avoiding expensive delays when threats are discovered

I need to design a slab on ground to Ciria C660. The slab is only 150mm thick and not for liquid retaining.

Sparing everyone the queries..Ciria C660 is necessary to limit crack widths and for other reasons. In my case, I have determined from Ciria that I need diameter 12 bars at 150mm centres.
