Injection Moulding Machine Operator Jobs (with Salaries ...

The machine can be set with a timer to retract (suck back) the screw slightly at this point (for 1 or 2 s before injection and for about 2.5 cm) so as to reduce drool out of the nozzle. This melt decompression feature may avoid need for a nozzle shutoff valve and is essential to relieve pressure in hot runner molds, which are discussed later.

Operation Cycle of Injection Molding

As shown in Eq. 15.10, the machine rate R_m depends on equipment purchased cost C_e , the years of payback period Y_p , and the number of work shifts N_s . A review of the capital costs of injection molding machines of a principal U.S. manufacturer shows that these can be directly associated with available clamping force.
