We know that skepticism is always wrong because when we compare it to common sense views and think carefully and honestly, we can see that common sense is always more likely (or certain).

Common Sense and the Self-Refutation of Skepticism

What Kant goes on to propose is that, instead of focusing on trying to establish with certainty - against skepticism - that the objects of common sense exist, let alone that they have philosophical dominance, or, in contrast, on explaining that it is only the theoretical discoveries of science that determine what is objective, one can rather work primarily to determine a positive and balanced philosophical relation between the distinct frameworks of our manifest and scientific images.

Other dogmatists seek certainty in the deliverances of pure reason. Sceptics object that rational self-evidence is no guarantee of truth. This book is an introductory and historically-based survey of the debate, siding for the most part with scepticism to show that the desire to vanquish it has often led to doctrines of idealism or anti-realism. Scepticism, science and common sense produce another view, fallibilism or critical rationalism: although we can have little or no certain knowledge ...

Dr Jacqueline Rowarth: Free speech v common sense and science

In this sense, those readings which see in scepticism either an ally or an adversary of Wittgenstein on the terrain of epistemology (and not, as in Cavell, on the rough ground of forms of life), both miss the point. This is the case, for instance, not only for Wright but also for the 'classical' Kripke (1982), as well as for Pritchard (2011 ...

Scepticism, science and common sense produce another view, fallibilism or critical rationalism: although we can have little or no certain knowledge, as the sceptics maintain, we can and do have plenty of conjectural knowledge. Fallibilism incorporates an uncompromising realism about perception, science, and the nature of truth.
