Judgment under Uncertainty: Heuristics and Biases Amos Tversky and Daniel Kahneman Tversky and Kahneman use this article to summarize and explain a compilation of heuristics and biases that hinder our ability to judge probabilities of uncertain events.

Summary (Heuristics and Biases)

This lecture covered judgement, Heuristics and Biases and gave an overview of how this topic relates to textbook models of choice under uncertainty and value. The lecture outlines what is meant by heuristics; discusses theories of why they may be adaptive; outlines the idea of bias and how this relates to heuristics; examines the main Kahneman and Tversky literature and looks at examples of experiments on availability, representativeness and anchoring; examines overconfidence and planning ...
