Specification. Eaves beams are manufactured from pre-hot dipped galvanised steel, Z275 coating and with a minimum guaranteed yield strength of 450 N/mm². Download our purlins technical manual located below for more information. Capacity. Based on single span condition. Nominal Dimensions

Eaves Beam Technical Details | Metsec

All Metsec lattice beams are supplied shot blasted and factory finished with a Zinc Phosphate primer as standard. Other painted finishes, including any standard RAL colour, are available upon request. This feature is particularly important if it is desired to leave the lattice members exposed as part of a 'feature' internal roof structure.

Home - MLB Steel

Lightweight steel lattice beams were first introduced by Metsec in the 1950's and their inherent advantages very quickly established the product as the first choice for structurally sound, cost effective construction. Since 2012 MLB have been the only independent manufacturer and supplier of the iconic Metsec lightweight lattice beam design.

Lightweight Roof Beams - MLB Steel

A typical Metsec lattice beam can weigh up to 50% less than its hot rolled counterpart and yet still achieve spans of up to 40m without the need for intermediate support columns, allowing designers greater flexibility when working to optimise internal space as they allow services to pass through the web of the lattice rather than having to suspend them underneath causing a significant loss of headroom.
