168 MICROWAVE AND RF DESIGN: A SYSTEMS APPROACH 4.1.2 Current and Voltage on Transmission Lines The majority of transmission lines used in design are planar, as these can be defined using masks, photoresist, and etching of metal sheets. Such lines are called planar interconnect.

### **Microwave and RF Design: A Systems Approach**

Microwave and RF Design: Networks presents the tools and techniques required to analyze and design microwave and RF circuits. Because of the finite speed of light, microwave circuits must be considered to be spatially distributed and so there is not a single ground. As such metrics that can be used to describe power flow are of most use.
