The common element in all financial crises is loss of confidence in the quality of the notes and deposits, leading to runs on banks in which those who hold bank debt (notes and deposits) seek to convert it into something of more stable value (gold, national bank notes, Federal Reserve Notes).

Misunderstanding Financial Crises: Why We Don't See Them ...

Abstract. Misunderstanding Financial Crises enriches the debate concerning the events of 2007–2008. The author challenges much of the conventional wisdom regarding financial crises and laments the tendency of mathematics to crowd history out of the study of economics. Eugene Fama, whom many regard as the father of modern finance, was asked in a May 2012 interview what he thought was the cause of the 2007–08 financial crisis.

Fama replied, "I think the global crisis was first a problem of political pressure to encourage the financing of subprime mortgages. Then, a huge recession came along and the house of cards came tumbling down." This not-unconventional assessment is precisely what Yale economist Gary B. Gorton seeks to refute in Misunderstanding Financial Crises. He argues that the latest crisis resulted from the same phenomenon that has triggered most financial crises — namely, a bank run.
