12V Solenoid Beam Engine, Built From Aluminium Scraps and Scavanged Componants.: This is how I built a little beam engine powered by a solenoid which runs on 12v DC. Due to the harsh winter I have been stuck in the house most of the time over the last few months, before Christmas I gathered up all the old hard drives, C...

12V Solenoid Beam Engine, Built From Aluminium Scraps and ...

The Model Engineer beam engine has been a popular model for more than a hundred years. It was first described by George Gentry in 1914. It was revisited by Exactus in 1959 and that is the version usually built today. The engine is of the centre column type and resembles that of the type of engine made by William Fairburn around 1840 - 1850.
