Rfid For Dummies

RFID is a very valuable business and technology tool. It holds the promise of replacing existing identification technologies like the bar code. RFID offers strategic advantages for businesses because it can track inventory in the supply chain more efficiently, provide real-time in-transit visibility(TV), and monitor general enterprise assets.

[PDF] Rfid For Dummies Download Full - PDF Book Download

A tag, in a passive RFID system, is a little transceiver waiting to be turned on (and no, that doesn't happen by seeing a tag of the opposite sex). The tag has a small computer chip (or memory area) that is programmed with information that uniquely identifies the tag. This information is sent when the tag is activated (turned on).
