and in the muscles that control jaw movement. The exact cause of a person's TMJ disorder is often difficult to determine. Your pain may be due to a combination of factors, such as genetics, arthritis or jaw injury. Some people who have jaw pain also tend to clench or grind their teeth (bruxism), although many people habitually clench or grind their teeth and never develop TMJ disorders.

TMJ disorders - Symptoms and causes - Mayo Clinic

Temporomandibular joint and muscle disorders, commonly called "TMJ," are a group of conditions that cause pain and dysfunction in the jaw joint and muscles that control jaw movement. Researchers generally agree that the conditions fall into three main categories: Myofascial pain involves discomfort or pain in the muscles that control jaw function.
