The Origins Of Backwardness In

The backwardness model is a theory of economic growth created by Alexander Gerschenkron. The model postulates that the more backward an economy is at the outset of economic development, the more likely certain conditions are to occur: Special institutions, including banks or the state, will be necessary to properly channel physical capital and human capital to industries.

The Origins of Backwardness in Eastern Europe. Reaching back centuries, this study makes a convincing case for very deep roots of current Eastern European backwardness. Its conclusions are suggestive for comparativists studying other parts of the world, and useful to those who want to understand contemporary Eastern Europe's past. Like the rest of the world except for that unique part of the West which has given us a false model of what was "normal," Eastern Europe developed slowly.
